Chibunna Peter, Onwuzuruigbo

Fullstack Applications developer (mobile and web),
Over 13 years of experience in applications development for various industries including health, finance, and agriculture.

Developer Profile / Portfolio

Skills

I work with the following frameworks and toolkits

HTML/CSS

JavaScript

Python

Django

PHP

Bootstrap

Tailwind CSS

Next.js

React.js
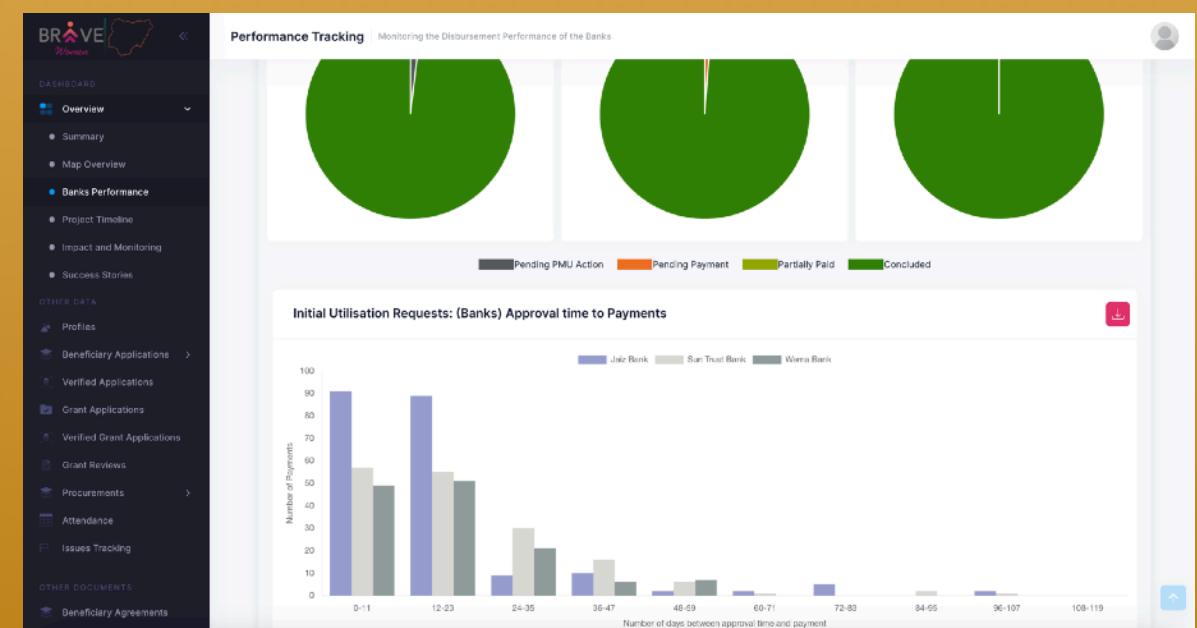

Flutter

React Native
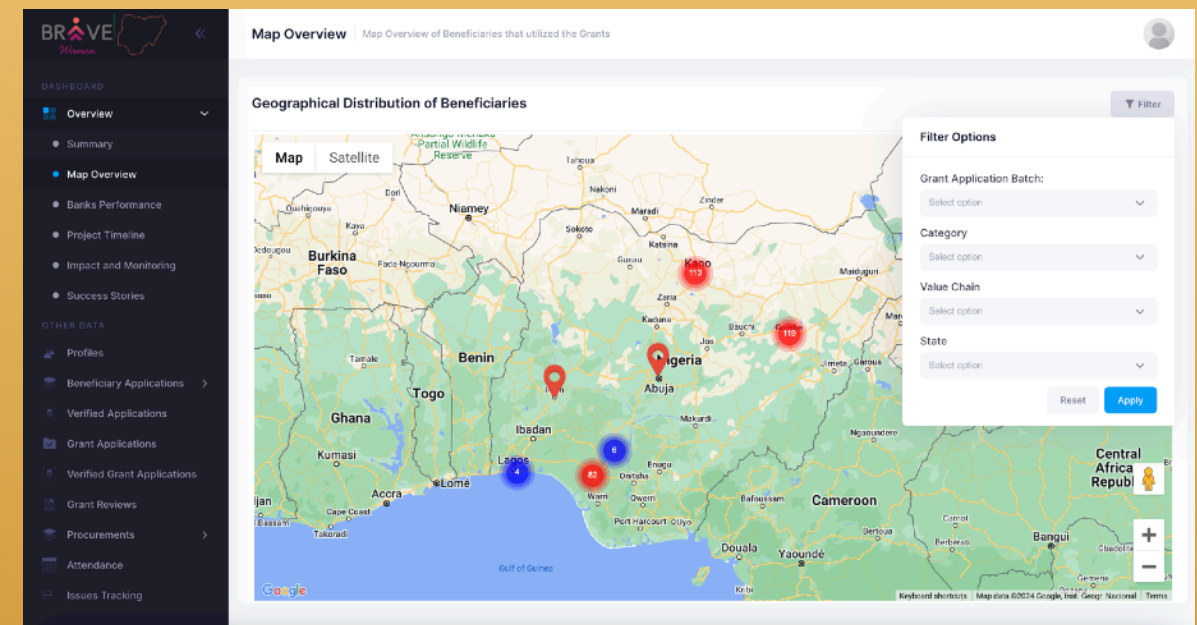

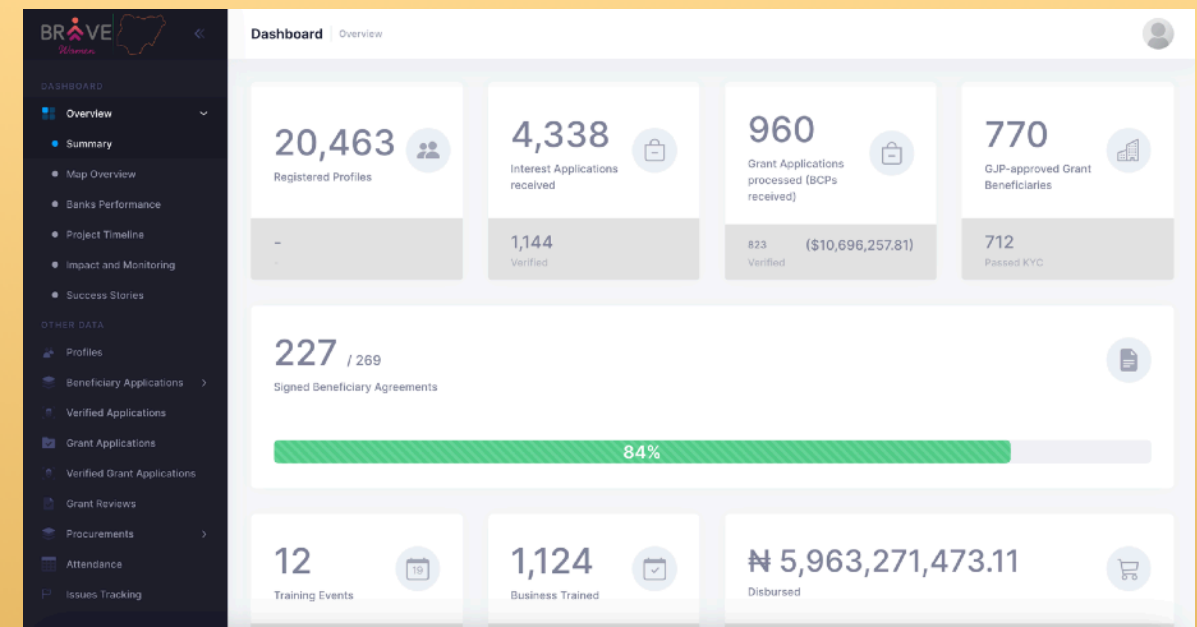

Node.js

Postgres

MySQL

MongoDB

Projects and Experience

1. BRAVE WOMEN NIGERIA PORTAL

Available at https://app.bravewomenng.com/

The web portal of the BRAVE Women Nigeria Project: A project for supporting women-owned/-led businesses in acquiring assets after contributing a matching grant.

2. Cynox Health

Available at
https://foresight.cynoxit.com.ng,
https://sahadhospitals.cynoxit.com.ng,
https://bodyaffairs.cynoxit.com.ng

Access can be provided on request

An electronic health records system, also described as a Hospital Management System.

For the daily running of hospitals: managing processes ranging from doctor appointments, queue management, consultation, laboratory and radiological investigations, pharmaceutical prescriptions, and specialty clinic managements like in-patients and admissions, ward rounds, nursing treatment sheet tracking, vital signs trending, surgery and attendant consent management, antenatal services till labour and delivery, and vaccination tracking,
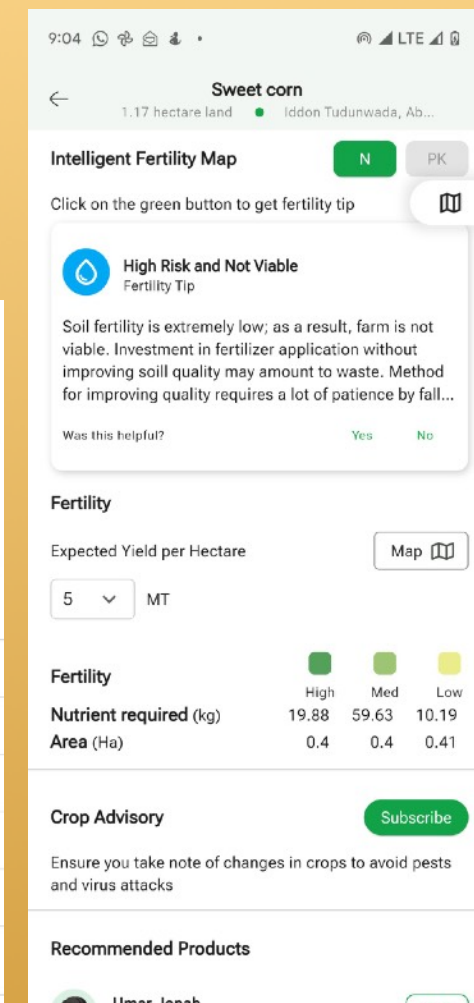

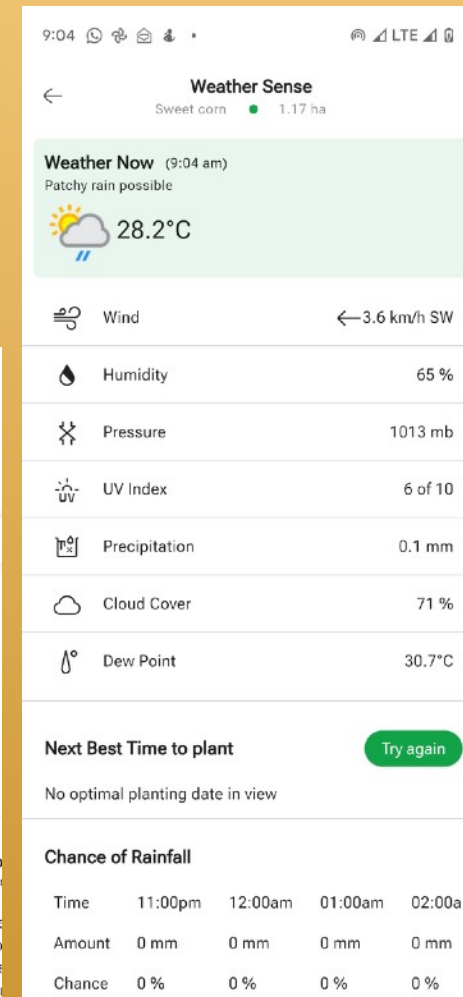

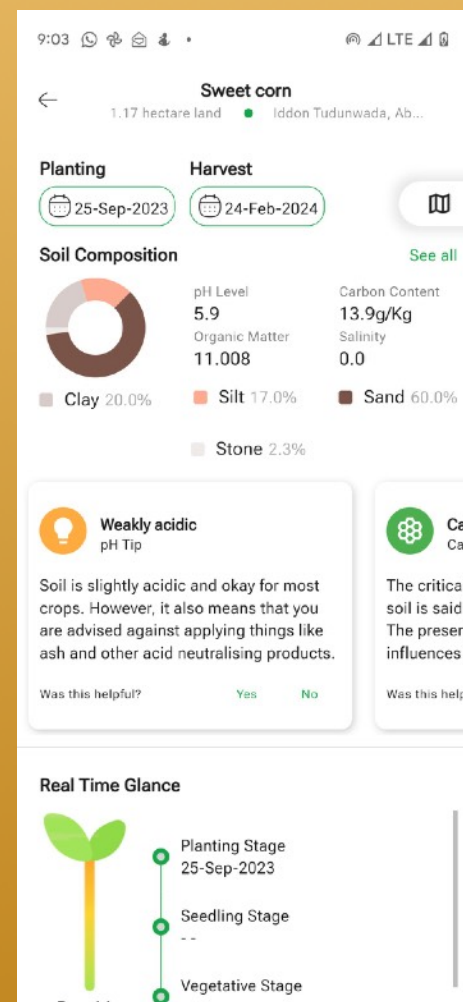

3. CAPTURE by Rural Farmers' Hub

Available at
https://play.google.com/store/apps/details?
id=com.ruralfarmershub.capture2

A mobile app for assisting farmers, extension agents and agricultural practitioners to make best decisions around farming, thereby aiding boosted yield. If features mapping a farm land, upload to a remote server, which runs analyses and provides soil information, weather information, crop and soil advisory against pests and fertiliser recommendation.
Farmers get to use the marketplace to sell their produce as well as order inputs like fertiliser, tractor services, seeds, and others.

… and lots more, either in the works or long forgotten or not remembered yet

I work on a MacOS and am very familiar with the Linux shell and can automate or schedule tasks using cronjobs via bash shell.

I have experience managing and deploying cloud instances of servers on Digital Ocean, AWS or Vercel.
